

Cyber Security - Cyber Security Contact with Special Interest Groups

The APM Cyber Security Team are members of multiple Cyber Security Special Interest groups.

A number of the APM Cyber Security team are active members of the Australian Information Security Association (AISA).

Additionally, multiple members of the APM Cyber Security team are certified in formal IT Information Security industry qualifications which allow access to qualified member only security briefings, vulnerability data, access to best practise guidance as well as opportunities to network and knowledge share with the Australia community. Additionally, Profession Development and continual learning opportunities are available through these industry groups.

To maintain these qualifications, 40 hours of continual education are required to be completed each year.

APM Cyber Security staff are members of

- International Information System Security Certification Consortium, (ISC2)
- Australian Information Security Association (AISA).

APM has signed a legal memorandum of understanding with the Australian Cyber Security Centre (ACSC), has access to a ACSC partner portal and community Slack server with threat intelligence and early warning notifications are a benefit of membership of these groups. These are provided via a variety of formats, email, portal access, Slack and dedicated Threat Intelligence feeds.
